

# ASCII Fun

In this program, ask user for a string and then print out **ASCII** code for each character. The program should continue until the user enters an empty string.

```
This program takes a string as input and prints ASCII code for each character.  
Enter a string: HELLO  
'H' : 72  
'E' : 69  
'L' : 76  
'L' : 76  
'O' : 79  
Enter a string: JAVA  
'J' : 74  
'A' : 65  
'V' : 86  
'A' : 65  
Enter a string:  
  
Applet started.
```
