

Introduction to Programming

with Java

Class: **CelsiusToFahrenheit.java**

Score: ★ (Simple)

Description:

Implement a program which constructs a table of Celsius to Fahrenheit equivalents using a **function** to perform the conversion.

Sample Run:

```
This program constructs a table of Celsius to Fahrenheit  
equivalents.
```

```
0 C = 32 F  
5 C = 41 F  
10 C = 50 F  
15 C = 59 F  
20 C = 68 F  
. . .  
85 C = 185 F  
90 C = 194 F  
95 C = 203 F  
100 C = 212 F
```
