

# Introduction to Programming with Java

Class: [DistanceConverter.java](#)

Score: ★ (Easy)

Prerequisites: ACM Task Force Commands

## Description:

Implement a program which asks for ***distance*** measured in inches from the user and converts it to ***centimeter*** and prints the result to console.

## Sample Run:

```
This program converts inches to centimeters.  
Enter number of inches: 5  
5 in = 12.7 cm
```
