

Introduction to Programming with Java

Class: **MonthName.java**

Score: ★★ (Easy)

Description:

Implement a program which tests the month name using a **function**. The program is supposed to take numeric values for month, day and year as input and print the corresponding date, where month is represented by its name, in output.

Sample Run:

```
Enter month : 3
Enter day : 2
Enter year : 1960
March 2, 1960
```
