

COMP 130 - Introduction to Programming with Java

Final Exam, Spring 2012

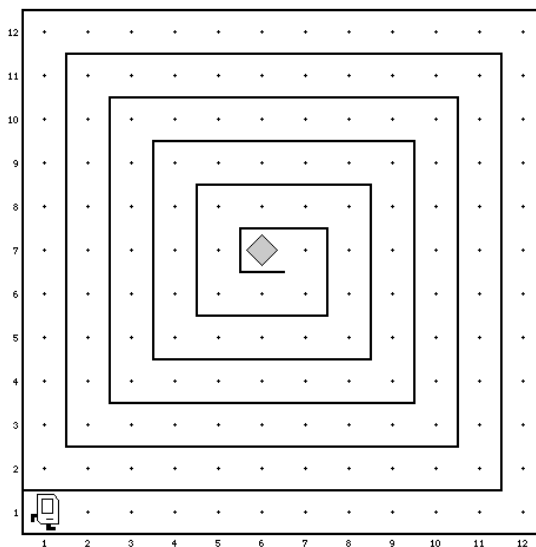

Class: **AdventurousKarel.java**

Karel wants to have a trip to the center of the world. A sample world is shown below:

Your task is to write a program that leads Karel to the center of the world which is indicated by a beeper.

Your program must be able to work on similar worlds with different sizes such as this:

The two different worlds above have been provided in the project folder, as “AdventurousKarel.w” and “AdventurousKarel2.w”.
