Introduction to Programming

with Java

Class: **BlockPiler.java**

Score: ⭐ ⭐ ⭐ (Medium)

Prerequisites: For Loops, ACM Task Force Commands

Description:

Implement a program that draws **piles of blocks** like a half square as shown below that width of the pile is taken from user. (Note that height and width of the pile increases in same proportion that 1st column has only 1 block, 2nd column has 2 blocks and so on until input limit is reached)

Sample Run:

```
Please enter the width of the pile: 8
```
