Introduction to Programming

with Java

Class: **WeightConverter.java**

Score: ⭐ (Simple)

Prerequisites: ACM Task Force Commands

Description:

Implement a program that converts a **weight** in *kilograms* to its English equivalent in *pounds* and *ounces*.

Additional Information:

```
POUNDS_PER_KILO = 2.2;
OUNCES_PER_POUND = 16;
```

Sample Run:

```
This program converts kilos to pounds and ounces.

Enter weight in kilograms: 83

83.0 kg = 182 pounds + 9.600000000000364 ounces
```
