Introduction to Programming

with Java
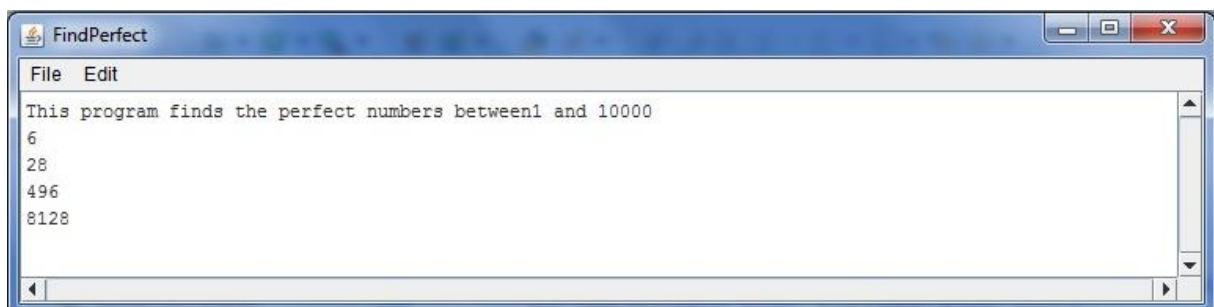

Class: **FindPerfect.java**

Score: ⭐ ⭐ ⭐ (Medium)

Description:

Implement a program which finds all the perfect numbers between constant upper and lower bounds. A perfect number is a positive integer which is equal to the sum of its proper positive divisors.

Sample Run:

```
FindPerfect
File  Edit
This program finds the perfect numbers between1 and 10000
6
28
496
8128
```
