Introduction to Programming

with Java

Class: **BruteForceGCD.java**

Score: ⭐⭐ (Easy)

Description:

Write a program which computes the greatest common divisor of two integers using the **brute force approach**. The program is supposed to take **two integers as input** and write their GCD in the console.

Sample Run:

```
This program computes the gcd of x and y.
Enter x: 15
Enter y: 10
Gcd(x, y) = 5
```
